## Internal Audit and Risk Management Workshop

*How to increase the performance and return from the organization's overall risk assessment process and overall risk coverage*

Ernst & Young in conjunction with CQS Technology Holdings/Methodware will be hosting an insightful 3-day Internal Audit and Risk Management workshop to help Managing Directors, General Managers, Financial Directors/Managers and Heads of Internal Audit, reach their fullest potential in this challenging financial climate.

Date: 22 - 24 September 2009 Time: 8:30am - 5:30pm

Cost: US\$450 (Excluding VAT) for the 3 days. (cost include coffee during breaks and lunch)

Venue: VIP Hotel, Avenida 25 de Setembro, Maputo, Moçambique

Bring your laptop (23<sup>rd</sup> and 24<sup>th</sup> September only) and benefit from a system demonstration tool for Internal Audit and Risk Management. This will also include a free temporary licence for 30 days from Methodware.

**NB:** The major part of the workshop will be conducted in English, assistance to Portuguese will be provided.

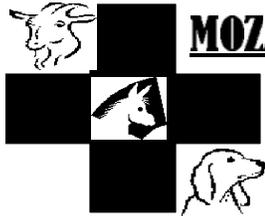

Registrations to be done at Ernst & Young offices. For assistance, contact Madalena Nhachale at : +258-21-353-000 or email [madalena.nhachale@mz.ey.com](mailto:madalena.nhachale@mz.ey.com).

The workshop is limited to 40 participants and registrations close on the 15 September 2009.

For further clarity about the workshop, please contact: Aubrey Ratswana on the same number above or email: [aubrey.ratswana@mz.ey.com](mailto:aubrey.ratswana@mz.ey.com)

*Claim your success and secure your place now!*

**MOZAMBIQUE ANIMAL PROTECTION SOCIETY**

**M.A.P.S.**

**ASSOCIAÇÃO MOÇAMBICANA DE PROTECÇÃO ANIMAL REG. NO 000499102**

**Welcome :** Welcome to MAPS – Mozambique Animal Protection Society. The object of this meeting is to introduce MAPS to the public, explain the road ahead for MAPS and how you can help.

**Introduction:** MAPS - Mozambique Animal Welfare Society. is an emerging NGO which has recently been registered here in Mozambique.

**Background:** Founded by Cheryl Coleman and Moira Felgate who like a lot of people are appalled at the extent of animal cruelty and neglect in Mozambique and were both determined to do something to improve the lives of animals here in Mozambique. Towards the end of 2008 Cheryl was able to arrange a meeting with Steven Chacha who is the head of the Africa division of WSPA – World Society for the Protection of Animals which is a UK based association. Steven was very encouraging and promised that his organization would be willing to help if we could get an NGO registered and up and running. So MAP's was formed. From then till now has been a very slow and frustrating slog to reach this point but now the real work starts.

**Objectives:** To stamp out cruelty to animals through intervention, education and legislation

**Intervention** – when you see an animal being abused to be able to step in and stop that abuse

**Education** – 90% of cruelty is through ignorance only 10% is actual melees

**Legislation** – to have the necessary legislation behind you to enable one to remove an abused animal and in server cases to be able to prosecute the offended.

Other objectives: To provide a safe haven to all animals in need, To establish clinics to provide affordable veterinary care to all

Promote animal education, To promote animal welfare, Promote pet sterilization, To update and enforce animal rights legislation

Establish mobil clinics to take primary veterinary care and education to rural areas

**GOALS: Short term goals:** A home base where we can set up an office, kennels and a basic clinic. A safe place where no animal will be turned away. A place strays can be taken too. Where injured or sick animals can be brought for veterinary treatment . Where any one looking for an animal can come and give an unwanted animal a loving home. Where affordable veterinary treatment is available for pets according to a means test

**Long term goal:** Branches of MAPS throughout Mozambique promoting animal welfare and offering affordable veterinary care to all. Trained inspectors who can investigate animal cruelty. Educational officers. Mobile clinics. Updating and improving the existing animal protection legislation

**IMMEDIATE NEEDS:** We are starting MAPS with a group of very enthusiastic and dedicated animal lovers but not much more. Our primary need is money, without it we can do very little to achieve any of our goals.

**Fund raising** - will be our main source of income. We need to establish a fund raising committee of people who have the time and dedication to get out there and raise lots of money primary to enable our organization to get off the ground and then to keep it running.

**Membership** – We are asking all interested people to please become paid up members of MAPS. This will help in a number of ways:- It is a good source of income, the money that comes in monthly from membership will go mainly towards funding our day to day costs – animal foods, staff salaries, telephone, transport etc.

We need volunteers to help with many different things from administration to helping in the kennels. We have different types of membership available. Adult, Junior (under 18 yrs), Corporate – for companies

**A home** -We are already getting a lot of calls about strays, injured animals and animals that are being kept in unsuitable conditions. Without a base, a place we can house these animals we are very limited to how much we can help these animals. We desperately need to find some where to rent or find some very kind person who is willing to let us use a house, building, or even a plot of land anything that we can at least get going on until we can raise the funds to purchase our own property. If anyone has any ideas please let us know.and make them more difficult to re-home.

Ideally we need a large piece of land between Maputo and Matola with a house or building that could be used for offices, storage areas and to establish a small basic clinic, grounds big enough to build kennels and holding facilities for dogs, cats, donkeys, goats etc.

**People** – To successfully run an organization like MAPS we are going to need a lot of dedicated people who are willing to give up their time and energy. If you can help with any of the following we would love to hear from you.

**Committee** – we need to elect a committee to run MAPS. We already have a board of directors who will be more of an advisory basis but we need a working committee who will be able to help with the needs and running of the committee.

We will have sub committee that will tackle specific areas eg Donkeys, Ferrell Cats, Fund raising, Legislation, Education, Mobil clinics, World Rabies Day, Juniors

*People with animal welfare back grounds would be a great help*

Anyone who has worked for an animal welfare organization full time or voluntarily.

Anyone who has been a certificated animal welfare inspector.

*Administration :*

1. Membership – We need someone to monitor and update the membership list.

2. News Letter – We would like to put out a monthly or bi-monthly newsletter keeping members updated on the happenings of MAPS

3. Juniors – We would like to encourage junior members – if we can educate our children to love and respect animals we will cut down the number of abuse cases in the next generation.

*Kennels : (Once we have)*

To start with we will more than likely run the kennels with voluntary staff until we have the funds to pay full time staff.

Admistator – someone to man the phone, attend to the public, admit animals in need etc.

Runners: - people who has the time to collect donations of food, blankets, etc.

Walkers/ groomers – to help exercise the dogs, wash animals and groom them.

Maintenance – to help keep the kennels and grounds in order.

Foster – people who are prepared to foster young animals or those that have problems

Arendsig (Eagleview) is a boutique cellar situated in the southern part of the Robertson Valley. It is here that Lourens van der Westhuizen hand-selects grapes, from single vineyards, to make distinct, hand-crafted wines with quality and character.

### **THE PERSONAL TOUCH**

- Careful selection of vines and terroir
- Hand sorting of grapes
- Selection of barrels to ferment and mature each wine
- Matching type of yeast – ‘wild’ or native
- Intense personal involvement at every stage of winemaking
- Deliberate placement in exclusive markets

Arendsig wines have risen out of the legacy of five generations of farmers at Wolvendrift. Situated on the Breede River between Robertson and Bonnievale the farm benefits from the cool morning dew and the Southern afternoon breeze. Here the fish eagles fly overhead, their distinctive call echoing above the vineyards.

Traditionally a deciduous fruit and wine grape farm it was only in 2004 that Lourens van der Westhuizen began establish a boutique winery and the first generation of winemakers began. Working as an equal partner in the vineyards with his father Frikkie, Lourens has carefully mapped the farm to plant vines in soils most suited to them.

This combination of maturity and youth has created well-balanced vineyards with top quality grapes. It is these carefully selected grapes that Lourens is now able to shape into the Arendsig hand-crafted range of wines.

**Lourens van der Westhuizen:** From a young age Lourens van der Westhuizen has dreamt of making his own wine in the old cellar on the farm. It is from his single-handed determination and desire to Hand-Craft top quality wines that Arendsig wines have taken flight.

In 2002 he completed a diploma course at Elsenberg with viticulture and agriculture as his main subjects. In 2003 he worked the season as a winemaker’s assistant at Glen Carlou, where he gained practical experience and knowledge from Walter and David Finlayson.

Later that same year he worked the harvest at Copain Wines, in California. Copain processes their own wines, as well as acting as a production facility for ten other cellars, which made the time he spent there both exhilarating and exhausting. What intrigued Lourens, however, was that the vineyards were all managed organically, wine was fermented with wild yeast, clones of varieties kept separate and all the cellar processes were run on a gravity system, with no pumping of wine. There was also attention to detail when choosing oak casks for the wines.

**With this experience behind him Lourens returned to Arendsig determined to combine all that nature has to offer in making his personal, Hand-Crafted range of wines. He is not only wine-maker but also viticulturist and marketing manager so is involved at every stage of his grapes journey from vineyard to table.**

Available stock: [Arendsig Chardonnay 2007](#) (Single Vineyard Wine)

[Arendsig Shiraz 2007](#) (Single Vineyard Wine)

### Arendsig Sauvignon Blanc 2008 (Single Vineyard Wine)

Wine making: In the old family cellar, with hand-plastered clay walls, Lourens works closely with his right-hand man, John Sebonika, to steer the grapes through the press, into the tanks, barrels and finally the bottle. It is a hands-on process, with the focus on gentle handling, the gravity fed movement of the wine and a personal selection of yeasts and wooden casks for maturation. All the labeling is also done on the farm, by hand.

“It is important to keep every different clone and grapes from different slopes separate during harvest, as well as in the cellar. It gives more components for the winemaker to experiment with and the opportunity to make a wine with complex flavours”

#### THE WINES

- Sauvignon Blanc
- Chardonnay
- Wild Yeast Viognier
- Shiraz
- Cabernet Sauvignon

**SAUVIGNON BLANC :** The Sauvignon blanc grapes are harvested early in the morning to capture their full flavour. The grapes are picked in six different stages and each one-ton parcel is processed individually. The grapes are crushed, de-stemmed and the skins and juice go into a gravity base tank. After cold maceration the juice is drained, through gravity flow, into 300L wooden casks for juice clarification.

The juice will settle on the lees at a 12C°, until the winemakers instinct lets him draw it off into a base tank for fermentation. The first few parcels of wine will ferment with wild yeast, while the remainder will be inoculated with native yeast.

After the fermentation process the wine goes into 3000l stainless steel tanks for ageing on the lees – a period decided by the palate of the winemaker. The wine then goes through cold stabilization before fining and bottling.

Arendsig Sauvignon Blanc – This is an elegant, crisp wine with green-pea aromas and a tropical fruit palate.

**CHARDONNAY :** Picked at optimum ripeness to ensure he captures their fruit flavours, Lourens gently presses the Chardonnay grapes in a 1000 liter press. The free run juice goes directly into French oaks barrels to clarify, and after 2 days is then put back into the gravity base tank.

The wine then goes back into barrel for fermentation. Lourens allows the grapes to ferment with their naturally present ‘wild’ yeast for 50% of the time before he inoculates with a specifically chose yeast strain. After going through natural malolactic fermentation, which helps give the wine a good rounded mouth feel, the wine is then aged on the lees. This period varies from year to year. The wine is then racked and bottled.

Arendsig Chardonnay is a delicate wine with a typical lemon/tropical fruit nose, fine citrus on the palate with buttery undertones that support a gentle, lingering aftertaste.

**WILD YEAST VIOGNIER:** This is Lourens ‘wildcard’ wine! Made from just 10 rows of vines this one ton parcel of grapes is crush, de-stemmed and then the skins and juice go into a gravity base tank. Skin contact is maintained for 2 days, at 16C°, The free run juice is then put into barrels for settling. As soon as fermentation begins the wine is put into new French Oak barrels to ferment, using only the natural yeast present on the grapes. This wild yeast fermentation can take up to 3 months to complete. After malolactic fermentation has occurred the wine is regularly stirred to help ensure intense fruit aromas in the bottle.

Arendsig Wild Yeast Viognier – a wine infused with rich tropical fruit, with an up front palate showing good integration between wood and fruit.

## SHIRAZ

Planted on well-drained limestone the juice from the Shiraz grapes is concentrated and of exceptional quality. The berries are gently separated from the stalks and put into 500l wooden casks. The juice extracts colour and fruit from the skins and after 4 days wild yeast fermentation will start.

Three times a day the wine will be racked and then returned to the barrel, under a French micro-oxidation method called Delactash, to ensure optimal fruit extraction. At 5° Balling the free run juice is separated from the berries, which are then put through a basket press and this juice is added to the free run juice.

The juice then finishes fermentation in a tank before going back into specifically chosen barrels malolactic fermentation and ageing. Usually 90% French oak and 10% Hungarian oak is used, with perhaps some American oak barrels depending on the

## Apple Repair

*Got a sick Mac? No problem, just book it in for an appointment and we will fix it. No problem is too big. Whether it's setting up a network or just plain maintenance, we can help.*

*Please Contact on 84 4 123 44 or Email [romao@me.com](mailto:romao@me.com)*
